

Khaled Mohamed Saleh | Software Engineer and AI Developer

📍 New Cairo, Egypt | khaledmohamedsalleh@gmail.com | +201014334387 | LinkedIn: [Khaled Salleh](#)

GitHub: [kha1dx](#) | Website: [khal1dx.com](#)

Professional Summary

Software engineer and AI developer building full-stack, AI-powered products. I work on system design and microservices: splitting a product into services, designing the APIs and database schema between them, and shipping it to production on Google Cloud. Comfortable across React, Next.js, Vue 3, Python, and FastAPI.

Education

German University in Cairo, B.Sc. in Computer Engineering Sep 2022 – Jun 2027
(Expected)

• **Relevant Coursework:** System Design, Software Engineering, Computer Networks, Databases, Theory of Computation

Semester Abroad, German International University | Berlin, Germany Sep 2025 – Feb 2026

• Studied Data Structures and C++ in Berlin while interning at unyt.org.

Experience

Software Engineer, Agile Worx | Cairo, Egypt Mar 2026 – Present

- Joined as Software Engineer Intern, promoted to full-time Software Engineer after three months.
- Build **Agile Translate**, an AI-powered PowerPoint localization platform, from design to deployment with the team.
- Work across the stack: Next.js frontend, FastAPI services, Google Cloud SQL, and Firebase Auth on Google Cloud.
- Handle API design, database schema, and a translation cache that removes redundant LLM calls.

Software Engineering Intern, unyt.org | Berlin / Remote Sep 2025 – Mar 2026

- Built and shipped the “Network Inspector” module for the DATEX Workbench in Vue 3, giving developers real-time visibility into network traffic inside the IDE.
- Managed the full SDLC on an open-source codebase: issue tracking, implementation, and PR reviews.

Projects

[Agile Translate: AI PowerPoint Localization](#) 2026 [Live](#)

- Translates decks between English and Arabic while preserving layout, mirroring the design between LTR and RTL by editing PPTX/OOXML directly.
- Next.js, React, FastAPI, Google Cloud SQL, Firebase Auth, OpenAI API, Google Cloud.

[Deema: Bilingual Habit Tracker](#) 2026 [Live](#)

- Full-stack habit tracker where an LLM analyzes cross-habit patterns and reports them in plain language.
- Full Arabic and English with mirrored RTL and LTR layouts. Next.js, Supabase, Google OAuth, PWA.

[Prompt Studio: AI SaaS](#) 2025 [GitHub](#)

- AI-powered platform that helps users craft and iterate on optimized prompts for LLMs. Built with Next.js, Tailwind CSS, Shadcn UI, Supabase (auth + DB), and the OpenAI API.

[SCAD Internships Platform \(Team Project\)](#) 2025 [GitHub](#)

- Platform connecting university students with companies; built core dashboard features in Next.js and React.

Skills

System Design: Microservices, REST API design, relational schema design, caching strategies, authentication flows

Programming Languages: JavaScript, TypeScript, Python, Java, C, C++, SQL

Frameworks & Libraries: React, Next.js, Vue 3, FastAPI, Tailwind CSS, Shadcn UI

Tools & Platforms: Google Cloud (Cloud SQL, Firebase), Docker, Git, PostgreSQL, Supabase, OpenAI API

Languages: Arabic (Native), English (Fluent), German (Intermediate)

Achievements

McKinsey Forward Program Dec 2024

Completed a globally-selective leadership program focused on problem-solving, digital skills, and communication for early-career professionals. [\[Certificate\]](#)
